

## SHALOM ESX RISK SOFTWARE EARNS IBM READY FOR SECURITY INTELLIGENCE

Houston, TX— January 21, 2014 – Nowell Development today is announcing that the company has successfully completed the validation process for the “IBM Ready for Security Intelligence – People” program for the Shalom ESX for Cloud Security Platform Product

This technical validation process assures that the advertised features of the product have reached a certain acceptable level of quality and assurance. Shalom ESX integrates with IBM Security Directory Server v 6.3 to provide cloud security, real time risk analytics, and knowledge authentication services for identities provisioned via IBM LDAP Directory server

Omon Edeki of Nowell Development issued a statement:

“We want to thank the IBM PartnerWorld Ecosystem team for the excellence, teamwork and confidence expressed in this project. These actions show why IBM is a global market leader. The combined offerings of Shalom-ESX and IBM Security Directory Server will offer customers a heightened level of confidence, security and integrity assurance as they begin to move parts of their infrastructure to various cloud hosted application service models for efficiency and cost reduction. We are thankful and May God richly bless this partnership”
