# What is GRC?

Governance Risk and Compliance

Risk management is about measuring risk to improve outcomes

Governance is driven by company to “do better” for the better

Compliance comes from regulations guaranteeing health, safety, quality, supply chain availability

Policies and procedures drive GRC to “make things better”!

# VerityBeyond GRC

**Simplify & Scale Affordably**

Software that helps a team to implement GRC

Define most important standard operating procedures (SOP workflows)

These cybersecurity safety SOPs drive outcomes for various departments: Quality controls, HR, customer care, IT, Service management, maintenance, incident management, supply chain inventory, accounts receivables, order management, safety maintenance

Customer request processing

# VerityBeyond – make it SIMPLE

Software allows to define digital SOPs, so that teams can follow them and use them to make the process simpler and better

Helps to streamline service management processes

Enhance quality of customer service and asset services

Enables a business to track, improve and measure the most important aspects of their operation

# Feature areas

Customer onboarding and registration

Customer lifecycle management & order requests

Supply chain: multisite multiuser inventory risk management

SOP workflows for processing CX requests

Asset onboarding and management

Asset depreciation and lifecycle management

Asset certifications and maintenance

Service management quality control

# Advantages

Reduced cost

Improved performance

Ease of use, ease of training and installation

Better customer experience

Measure what is most important

Enables your business and team to become more successful

Better internal collaboration for simple and complex SOP workflows for customers, processes and assets

# Cloud Solution

Web cloud software as a service hosted in the cloud

Easy to use, easy to access with minimal customization

Affordable and can be adapted to multiple use cases

Functional areas: HR, quality-safety controls, Supply chain, inventory management, customer order processing, policy process management, maintenance and risk inspections

Integrated Risk Management

Focus on the most important areas of your business, that affects your customer success

# Applications & use cases

Cyber security NIST, ISO-27001, SOC2-Type2, PCI, HIPAA,HiTrust, CIS Controls, OSHA Compliance

Regulatory Compliance

Utilities safety: energy, water, electric

Shipping and Logistics

Healthcare

Insurance

Manufacturing

IT and IT Service management

Facilities management

Companies that adopt GRC software will grow, improve customer success and reduce risks
