Nowell Development 2022 Developer & Partner Update

Most excellent greetings to you – to all our friends, clients, and service delivery partners. We're thankful that many are returning to good health and the vaccines are producing good results and reducing the number of cases, and now things are gradually returning to normal. First and foremost, we wish good health to you and yours. In our update we're highlighting new integrations with cloud applications

We're excited to share some progress in our Customer Experience ECommerce BPM digital supply chain software product roadmap. We have released Verity Ecommerce BPM 4.5.4 which now includes the following updates

1. Verity BPM Integration with front-end customer facing WebCommerce. We have now built out a new version of our BPM software to better connect with our clients' websites, granting them the ability to perform the following operations: onboard new customers, register and update new customer information, submit and query new service and product requests all from your website or mobile device. In addition Verity BPM has a refreshed graphical user interface for improved user experience with a cleaner iconset

2. Integration with ShipEngine/ShipStation RESTAPI for multicarrier supply chain shipping operations. This integration between Verity Ecommerce allows logistics providers to get real time shipping rates, prices, generate shipping labels per carrier, etc. from the major carriers including FedEx, UPS, Stamps.com,USPS, DHL. All that is required is for clients to setup a ShipEngine account and link their carriers account, and Verity Ecommerce will be able to generate labels and gather shipping rates per linked account.

3. Intuit QuickBooks Online integration: Several of our clients have requested the ability to sync customer data from popular accounting packages such as QuickBooks, Square, PayPal etc. With our new integration, Verity BPM

Integrity, service and teamwork
"A partner you can trust"
BPM Software integration services

Ecommerce will now be able to push customer invoices seamlessly from customer interactions, all the way to generating invoices and receiving payments from QuickBooks. QuickBooks has secure integrations with several other 3rd party apps including Square, Veem, PayPal etc. This allows us to focus on doing what we do best: BPM web integrations while outsourcing the financial processing to Intuit QBO. In addition, customers who use Square/PayPal can sync their sales payments with QBO. Verity Ecommerce: fully supported in MacOS Big sur and Microsoft Windows 10, continued support for MySQL 8.0, Oracle 12c and Oracle 19c/21c

4. Reduced pricing for small and disadvantaged businesses, SMB. Customers can take advantage of discounted rates if you are a small business owner. We believe in supporting small businesses!

5. Continued successful implementations and production support of SailPoint IAM software for various enterprise clients adopting cloud solutions such as AWS, Azure and Oracle Cloud.

Thanks to you our clients, supporters and service delivery partners we are most grateful and look forward to continuing to be of service to you! Our prayer is that you and your loved ones will come out healthy and strong during these challenging times. Reach out to any of us on our website for more information on how we might be able to be of service to you.
