Verity ECommerce BPM 4.5 Successfully Released – Mar-26-2021

Nowellgroup is excited to release the latest version of our Verity BPM cloud software solution version 4.5; This software is *specifically designed to help businesses grow while managing operational risks*, allowing them to focus on what matters most while simplifying business processes, and business workflows in several aspects of your departments including

- Customer traffic management via Web Front End Interface
- Asset maintenance and digital inventory management
- Web based digital services and orders requests for customers
- Standard operating procedures workflows (for services management)
- Workflows for integrated policy management
- Supply chain management and logistics
- IT operations service management
- Risk management, compliance regulations such as HIPAA, PCI, COBIT, SOC2, OSHA

The solution is deployed and delivered from any cloud provider of your choice and the software is very easy to install and use, due to cost effectiveness of cloud deployment models. The solution is well priced for the small and medium businesses. In addition, Verity BPM is now available for Apple MacOS and Microsoft Windows allowing small and midsize business owners to use the software on any cloud and IT provider of their choice. Applicable to: healthcare, general retail, financial services, manufacturing, IT operations, hospitality, commercial real-estate, and service based businesses

We welcome you to reach out to us to learn more, we would welcome the opportunity to help you grow!
