

# Verity Symphony BPM Software Implementation Services

Midsized & large enterprise customers are using the power of software to simplify their business operations, digitize/onboard their standard operations procedures, reduce duplicate expenses, meet customer service and maintenance schedule requests, and manage the logistics of their supply chain maintenance operations. Our software [Verity Symphony BPM](#) assists with these requirements and is easy to build, deploy and administer designed for small, large and midmarket companies that are looking to roll out powerful software solutions to enable them to thrive, *survive* and grow in this challenging market environment. BPM software is applicable to several industries and use cases including: financial services, facilities maintenance operations, restaurant and dining, hospitality and hotels, healthcare patient service operations management, automotive service repairs, single family and multi family home and digital certification of commercial real estate, as well as energy utilities, and more
