

Supply Chain: Shipping, Logistics, Inventory Distribution

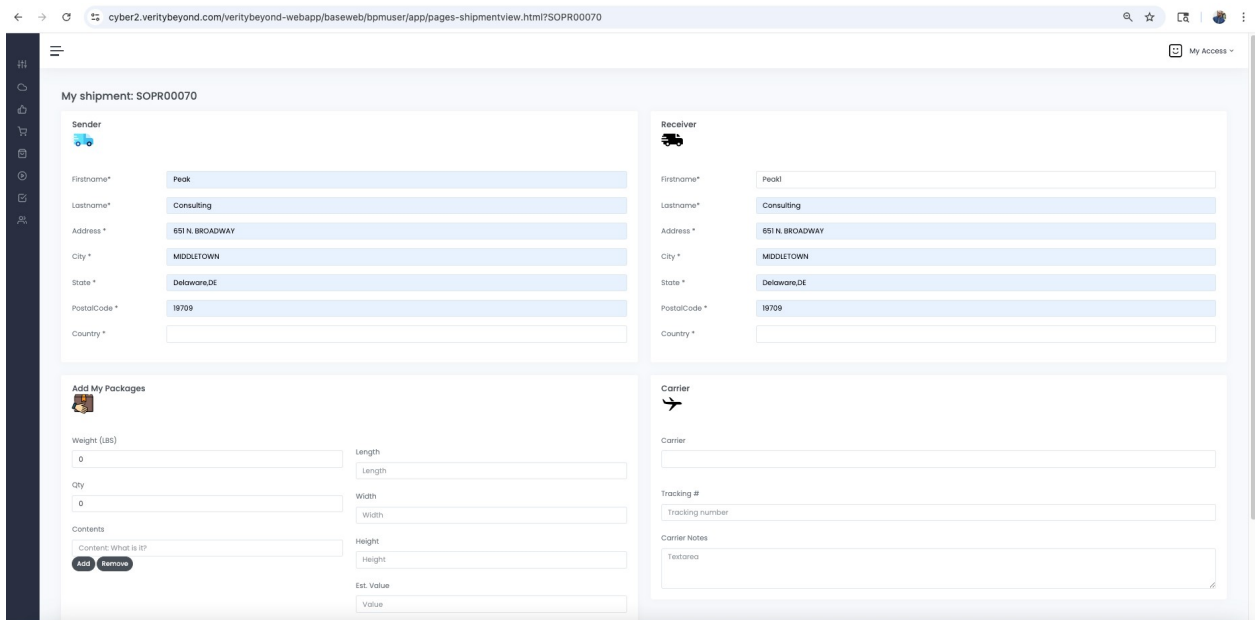

Vertical: Shipping, Logistics & Supply Chain

VerityBeyond GRC software can be used to co-ordinate your business process for your shipping customers, their shipping requests ,capture the details and keep all the documents and data organized . Supported features include

1. Onboarding your shipping departments, suppliers, partners and employees to create and update shipping orders for internal and external customers
2. Setup shipping , receiving, escalation, incident workflows according to your business process
3. Onboard your partner organizations and suppliers under the platform to share and receive critical shipping information, documents , invoices, receipt documents and data
4. Track the entire operation from end to end with all your partners in your shipping supply chain

Enter in the shipping detail and your team can have the order/workflow adjusted to meet your requirement

- Work with your team to accept the request, process the flow across various teams and department and fulfill
- Once the data is received it can be sent to an external source or exported
- Hosted in the Oracle cloud, software as a service can scale globally

- Multi user, multi location
